DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 6-8, drawn to a construct comprising a metal ion-binding domain.

Group II, claim(s) 2 and 6-8, drawn to a manufactured peptide and salts thereof.

Group III, claim(s) 3 and 9-16, drawn to a combinatorial library of peptides.

Group IV, claim(s) 4, 9-15 and 17 drawn to a combinatory library of peptidomimetic.

Group V, claim(s) 5, 9-15 and 17, drawn to a combinatorial library of peptide or peptidomimetic members in solution.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: they lack the same special technical features as each of the compounds differs in structure, mode of operation and possibly function.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

A. Peptide formula as recited in claim 6 i.e., a single sequence if for example, the first formula is elected.

B. S-protecting group as recited in claim 11 or claim 16 or claim 17.

C. Peptide or peptidomimetic as recited in claim 5.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant

Art Unit: 1639

must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

See above

The following claim(s) are generic: claims 1-5.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each of the species recited in each of the subgroups differs in structure. A prior art reference anticipating one species would not render obvious the other species in each of the subgroups.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must

Art Unit: 1639

be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
